

Whitefish Gutting Machine

This machine operates according to the same procedure as the BAADER 162, however, within the range of smaller whitefish from abt. 35 to 70 cm in total length (= 0.5 to 2 kg). When using both machines at the same time, total catches can be processed after rough grading since the working ranges of both machines overlap generously.

Operator requirements	1 person
Throughput rate	25, 35 or 40 fish/min
diagram to the right	throughput rate of the machine at 35 fish/min
Power consumption	2 kW
Water consumption	abt. 25 l/min
Dimensions	abt. 1.40 x 1.20 x 1.80 m
seaworthy packaging	abt. 1.55 x 1.45 x 2.10 m
Weight	abt. 650 kg net
	abt. 920 kg gross (incl. accessories)

The BAADER 166 can be combined with the BAADER 184.

* For the fish species which can be processed, please refer to the list of fish names from page 171 no. 77, 83, 86, 87, 88, 89, 90 and 97.
