

Klipfish Machine

This machine is designed for processing gutted and headed cod and saithe* from abt. 40 to 110 cm in total length (= 0.60 to 10 kg). It performs all cuts required for the production of klipfish using tools which are automatically controlled by the length of the fish in each case. A complete klipfish plant is obtained in conjunction with the round-cut heading machine BAADER 415 or with the combined gutting and heading machines BAADER 162 and 166.

- Operator requirements** 1 person
- Max. throughput rate** 25 fish/min
diagram to the right
- throughput rate of the machine** at 22 fish/min
- Power consumption** 3 kW
- Water consumption** abt. 15 l/min
- Dimensions** abt. 4.10 x 1.00 x 1.70 m
- seaworthy packaging** abt. 3.65 x 1.20 x 2.00 m
- Weight** abt. 1,530 kg net
abt. 2,090 kg gross
(incl. accessories)

The BAADER 440 can be combined with the BAADER 415, 162 and 166.

* For the fish species which can be processed, please refer to the list of fish names
